

# New LinkTek product lets Adobe Acrobat users automatically fix broken links when files are moved or renamed!

CLEARWATER, FLORIDA, USA — LinkTek Corporation, a leading provider of data migration software, announced today the release of a new version of their *LinkFixerPlus* link maintenance and repair program, designed specifically for Adobe Acrobat users. *LinkFixerPlus for Adobe Acrobat* ensures that links contained in Acrobat files, such as hyperlinks, image links and links to other files, are *automatically* updated when files are moved or renamed. This eliminates the broken links that would otherwise be produced when PDF files are migrated to a new server or moved to a new folder. It also eliminates broken links when files referenced by PDF files are moved or renamed. This newest release adds to *LinkFixerPlus*' current ability to move and rename Excel, Access, Word, PowerPoint, AutoCAD, InDesign, PageMaker, HTML and Windows shortcut files without causing broken links.

IT professionals who are responsible for moving end-users' Adobe Acrobat files when conducting data migrations, due to server consolidations, server name changes, path name changes or folder reorganizations, must also contend with the problem of ensuring that links contained within these files are not broken as a result of the move.

This is the problem that LinkTek's patented product, *LinkFixerPlus for Adobe Acrobat* solves. It has been designed so that IT professionals can automate the reporting, management and repair of links in Adobe Acrobat files so they won't have to worry about broken links as a result of files being moved or renamed.

*LinkFixerPlus for Adobe Acrobat* gives Acrobat users the ability to:

\* Move or rename Adobe Acrobat files, and the files they link to, in batch, using sophisticated rename rules, without causing broken links in the Acrobat files.

- \* Perform global search and replace operations on filenames contained in links, in large batches of Acrobat files, with a single command.
- \* Generate a broken link report listing all Adobe Acrobat files containing broken links, so they can be fixed before causing problems.
- \* Generate a regular report listing each Adobe Acrobat file followed by a list of the files it links to.
- \* Generate a cross-reference report listing each Adobe Acrobat file followed by a list of all the files that point to it.
- \* Safeguard links in Adobe Acrobat files, allowing them to be automatically repaired when they become broken or when files are moved or renamed.
- \* Fix broken links in safeguarded Adobe Acrobat files totally automatically.
- \* Report whether a file is being pointed to by any Adobe Acrobat file anywhere on a user's system, thereby letting the user know whether the file is safe to delete, rename or move.

*LinkFixerPlus* is the first software application that can fix broken links automatically when files or folders are moved or renamed. Using patent-pending technology, *LinkFixerPlus* helps eliminate the time-consuming and tedious process of manually finding and fixing broken links. Additionally, *LinkFixerPlus* can create a variety of detailed reports, in Comma Separated Value (CSV) or HTML formats, showing all of the links contained within files, including any broken links.

First introduced at the Internet World convention in New York City, *LinkFixerPlus* won the Best of Show award in the design category. Since that time, *LinkFixerPlus* has been favorably mentioned on: Computer America talk radio, CNET radio, CNNfn, PC

Magazine, Entrepreneur Magazine, the Washington Post, the New York Times, Computer World and the Wall Street Journal.

## **How To Contact LinkTek**

For more information about *LinkFixerPlus*, please visit LinkTek's Web site at <http://www.linktek.com>, call 1-727-442-1822 extension 9376 or send an e-mail to [9376@linktek.com](mailto:9376@linktek.com).

## **About LinkTek**

Headquartered in Clearwater, Florida, LinkTek Corporation provides software solutions for automating the management and repair of links contained within a wide variety of prevalent file formats. LinkTek's flagship product *LinkFixerPlus* breaks new ground and introduces the new software category of "automatic link repair". It is a leading data migration and link repair tool used by some of the world's largest corporations. *LinkFixerPlus* is the first application designed to automatically fix broken links when files are moved or renamed.
