

Newest *LinkFixerPlus* automatically fixes broken links in files moved into document management systems that support WebDAV.

CLEARWATER, FLORIDA, USA — LinkTek Corporation, the world's leading provider of software solutions that automate the management and repair of links contained within a wide variety of popular file formats, announces the latest release of their *LinkFixerPlus* link maintenance and repair software. The newest release allows IT personnel to move files into many prevalent document management systems and automatically fix broken links created in the process. (Visit <http://www.LinkTek.com>).

“This newest release of *LinkFixerPlus* provides the first automatic link repair solution for organizations who are implementing document management or enterprise content management systems that support the industry standard WebDAV (Web-based Distributed Authoring and Versioning) protocol. IT professionals who are moving their organizations' files into a DMS are running into a serious problem. Many files today have links to other files and these links typically break when the files are moved into a DMS. *LinkFixerPlus* fixes this problem of broken links automatically.” said Bruce Saliga, President of LinkTek.

“To date, the issue of embedded file links becoming broken when files are migrated into a DMS has been a problem without a solution and has resulted in slowed, delayed or even canceled implementations of document management systems within organizations. But now, for the first time, the new WebDAV-enabled *LinkFixerPlus* offers these organizations a timely, reliable and proven solution for the problem of fixing broken links in files that have been moved into DMS's that are WebDAV capable.”

Using patented *LinkFixerPlus*, files can be moved into a WebDAV-capable DMS and the links in the files are simultaneously corrected. *LinkFixerPlus* can fix broken links *automatically* even if the files are moved into the DMS using Windows Explorer or some other method. *LinkFixerPlus* automatically repairs broken links when Excel, Word, PowerPoint, Access, Acrobat PDF, AutoCAD, InDesign, PageMaker, HTML and other

files are moved from a local network into a DMS such as Open Text's Livelink, Microsoft's SharePoint or EMC's Documentum.

First introduced at the 2002 *Internet World* convention in New York City, *LinkFixerPlus* won the Best of Show award in the design category. Since that time, *LinkFixerPlus* has been favorably mentioned in: *Cadalyst Magazine*, *eWeek*, *Redmond*, *Windows IT Pro*, CNET radio, CNNfn, *PC Magazine*, *Entrepreneur Magazine*, *The Washington Post*, *The New York Times*, *Computer World* and *The Wall Street Journal*.

How To Contact LinkTek
