

Broken references in AutoCAD 2009 files no longer a problem with *LinkFixerPlus*.

CLEARWATER, FLORIDA, USA — LinkTek Corporation, the world's leading provider of software that automates the reporting, management and repair of links contained within a wide variety of popular file formats, announced today the release of a new version of their *LinkFixerPlus* link maintenance and repair software. (For additional information visit <http://www.LinkTek.com>).

The new version of *LinkFixerPlus* automatically fixes broken references in AutoCAD 2009 files that point to external files (such as xrefs, images, fonts and other linked files) when AutoCAD files are renamed or moved — for example, when files are renamed due to a project name change or when files are moved to a new folder, disk drive or server. It allows for the reporting, validation and automatic repathing and repair of xrefs and links contained within batches of AutoCAD drawing files.

This newest release adds to *LinkFixerPlus*' previous ability to rename and move AutoCAD R13 through R2008 files, as well as Excel, Word, Access, PowerPoint, HTML, InDesign, PageMaker, Acrobat PDF and Windows shortcut files, without causing broken links.

“*LinkFixerPlus* is a versatile tool that enables users and CAD managers to accurately and automatically maintain xrefs and links contained in AutoCAD files” says *Cadalyst Magazine*.

First introduced at the 2002 *Internet World* convention in New York City, *LinkFixerPlus* won the Best of Show award in the design category. Since that time, *LinkFixerPlus* has been favorably mentioned in: *Cadalyst Magazine*, *eWeek*, *Redmond*, *Windows IT Pro*, CNET radio, CNNfn, *PC Magazine*, *Entrepreneur Magazine*, *The Washington Post*, *The New York Times*, *Computer World* and *The Wall Street Journal*.

How To Contact LinkTek
